What's in the Box

- Looking Glass 8.9"

- HDMI Cable

- USB Type-C Cable

- Microfiber Cloth

- Carrying Case

- Leap Motion (Optional Add-on)

Cleaning Note

Please clean your Looking Glass only with the included microfiber cloth. Do not clean with other cleaning agents or rubbing alcohol as this will damage the front-surface of the Looking Glass Display.
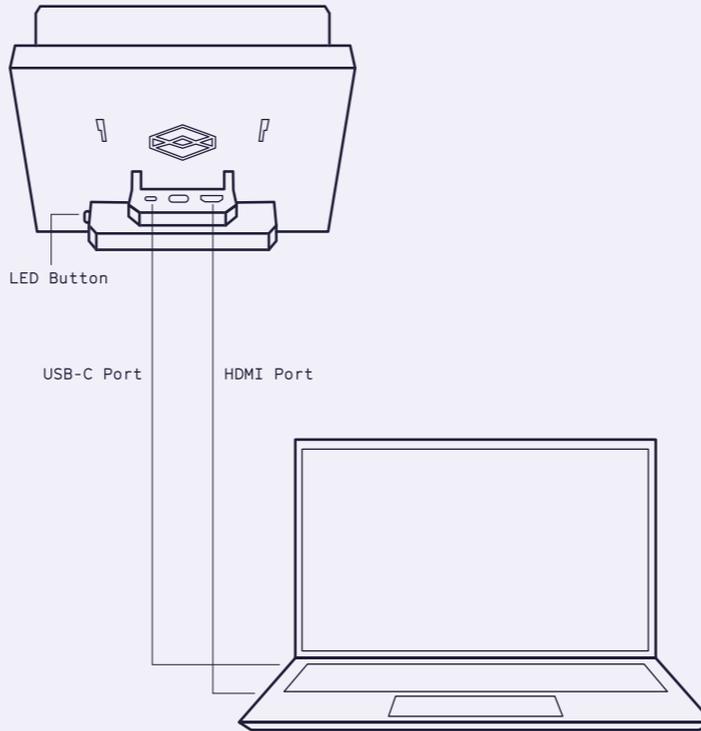

Microfiber Cloth

Buttons

There are four buttons on the front face of the aluminum housing of the Looking Glass. Each of these buttons perform a different action for each Looking Glass application depending on use.

Interaction Buttons

Cable Connection

LED Button

USB-C Port   HDMI Port

1. Connect the included HDMI cable and USB Type-C cable to your host computer's HDMI & USB 3.0 ports.

2. Once both cables are connected, you should see the LEDs around your Looking Glass light up.

3. There is a small switch behind your Looking Glass that will toggle on/off the LEDs that illuminate the system. The purpose of the LEDs is to add depth cues to the content made in the Looking Glass and are optional in the display's functionality.
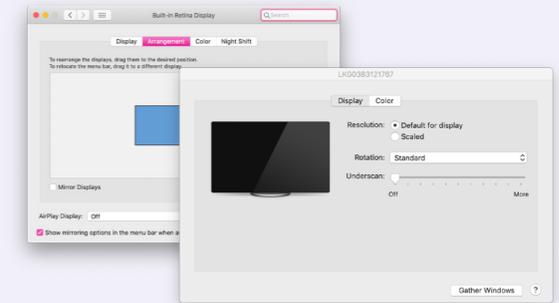

Display Settings

PC:

- Verify that your displays are extended

- Set your second display to 2560px X 1600px

- Ensure that the second display is set to 100% scale

Mac:

- In the ARRANGEMENT tab, verify that yourdisplays are extended. We recommend that you position your Looking Glass on the left of your main display and aligned at the top.

- In the DISPLAY tab, ensure that this is set at "Default for Display"

To activate your Looking Glass, head here:
