**TIGER UP**

# ABOUT PROJECT

**TigerUP** is a **decentralized** solution for forming a liquidity pool using a DAPP platform through the operation of a **smart contract**, which establishes decentralized rules for interaction between two counterparties **without human intervention.**

Payments are formed through the fund's earnings using the liquidity pool, where the entire transaction history is reflected.

**TigerUP** is a project that aims to provide the opportunity for improving the quality of life for each participant. Its **mission** is to give people a chance for a better future and help them achieve their goals.

# BINANCE

## ECOSYSTEM

**Binance** - is a cryptocurrency ecosystem that includes a cryptocurrency exchange, **blockchain** platform Binance Chain, and the cryptocurrency **BNB** .

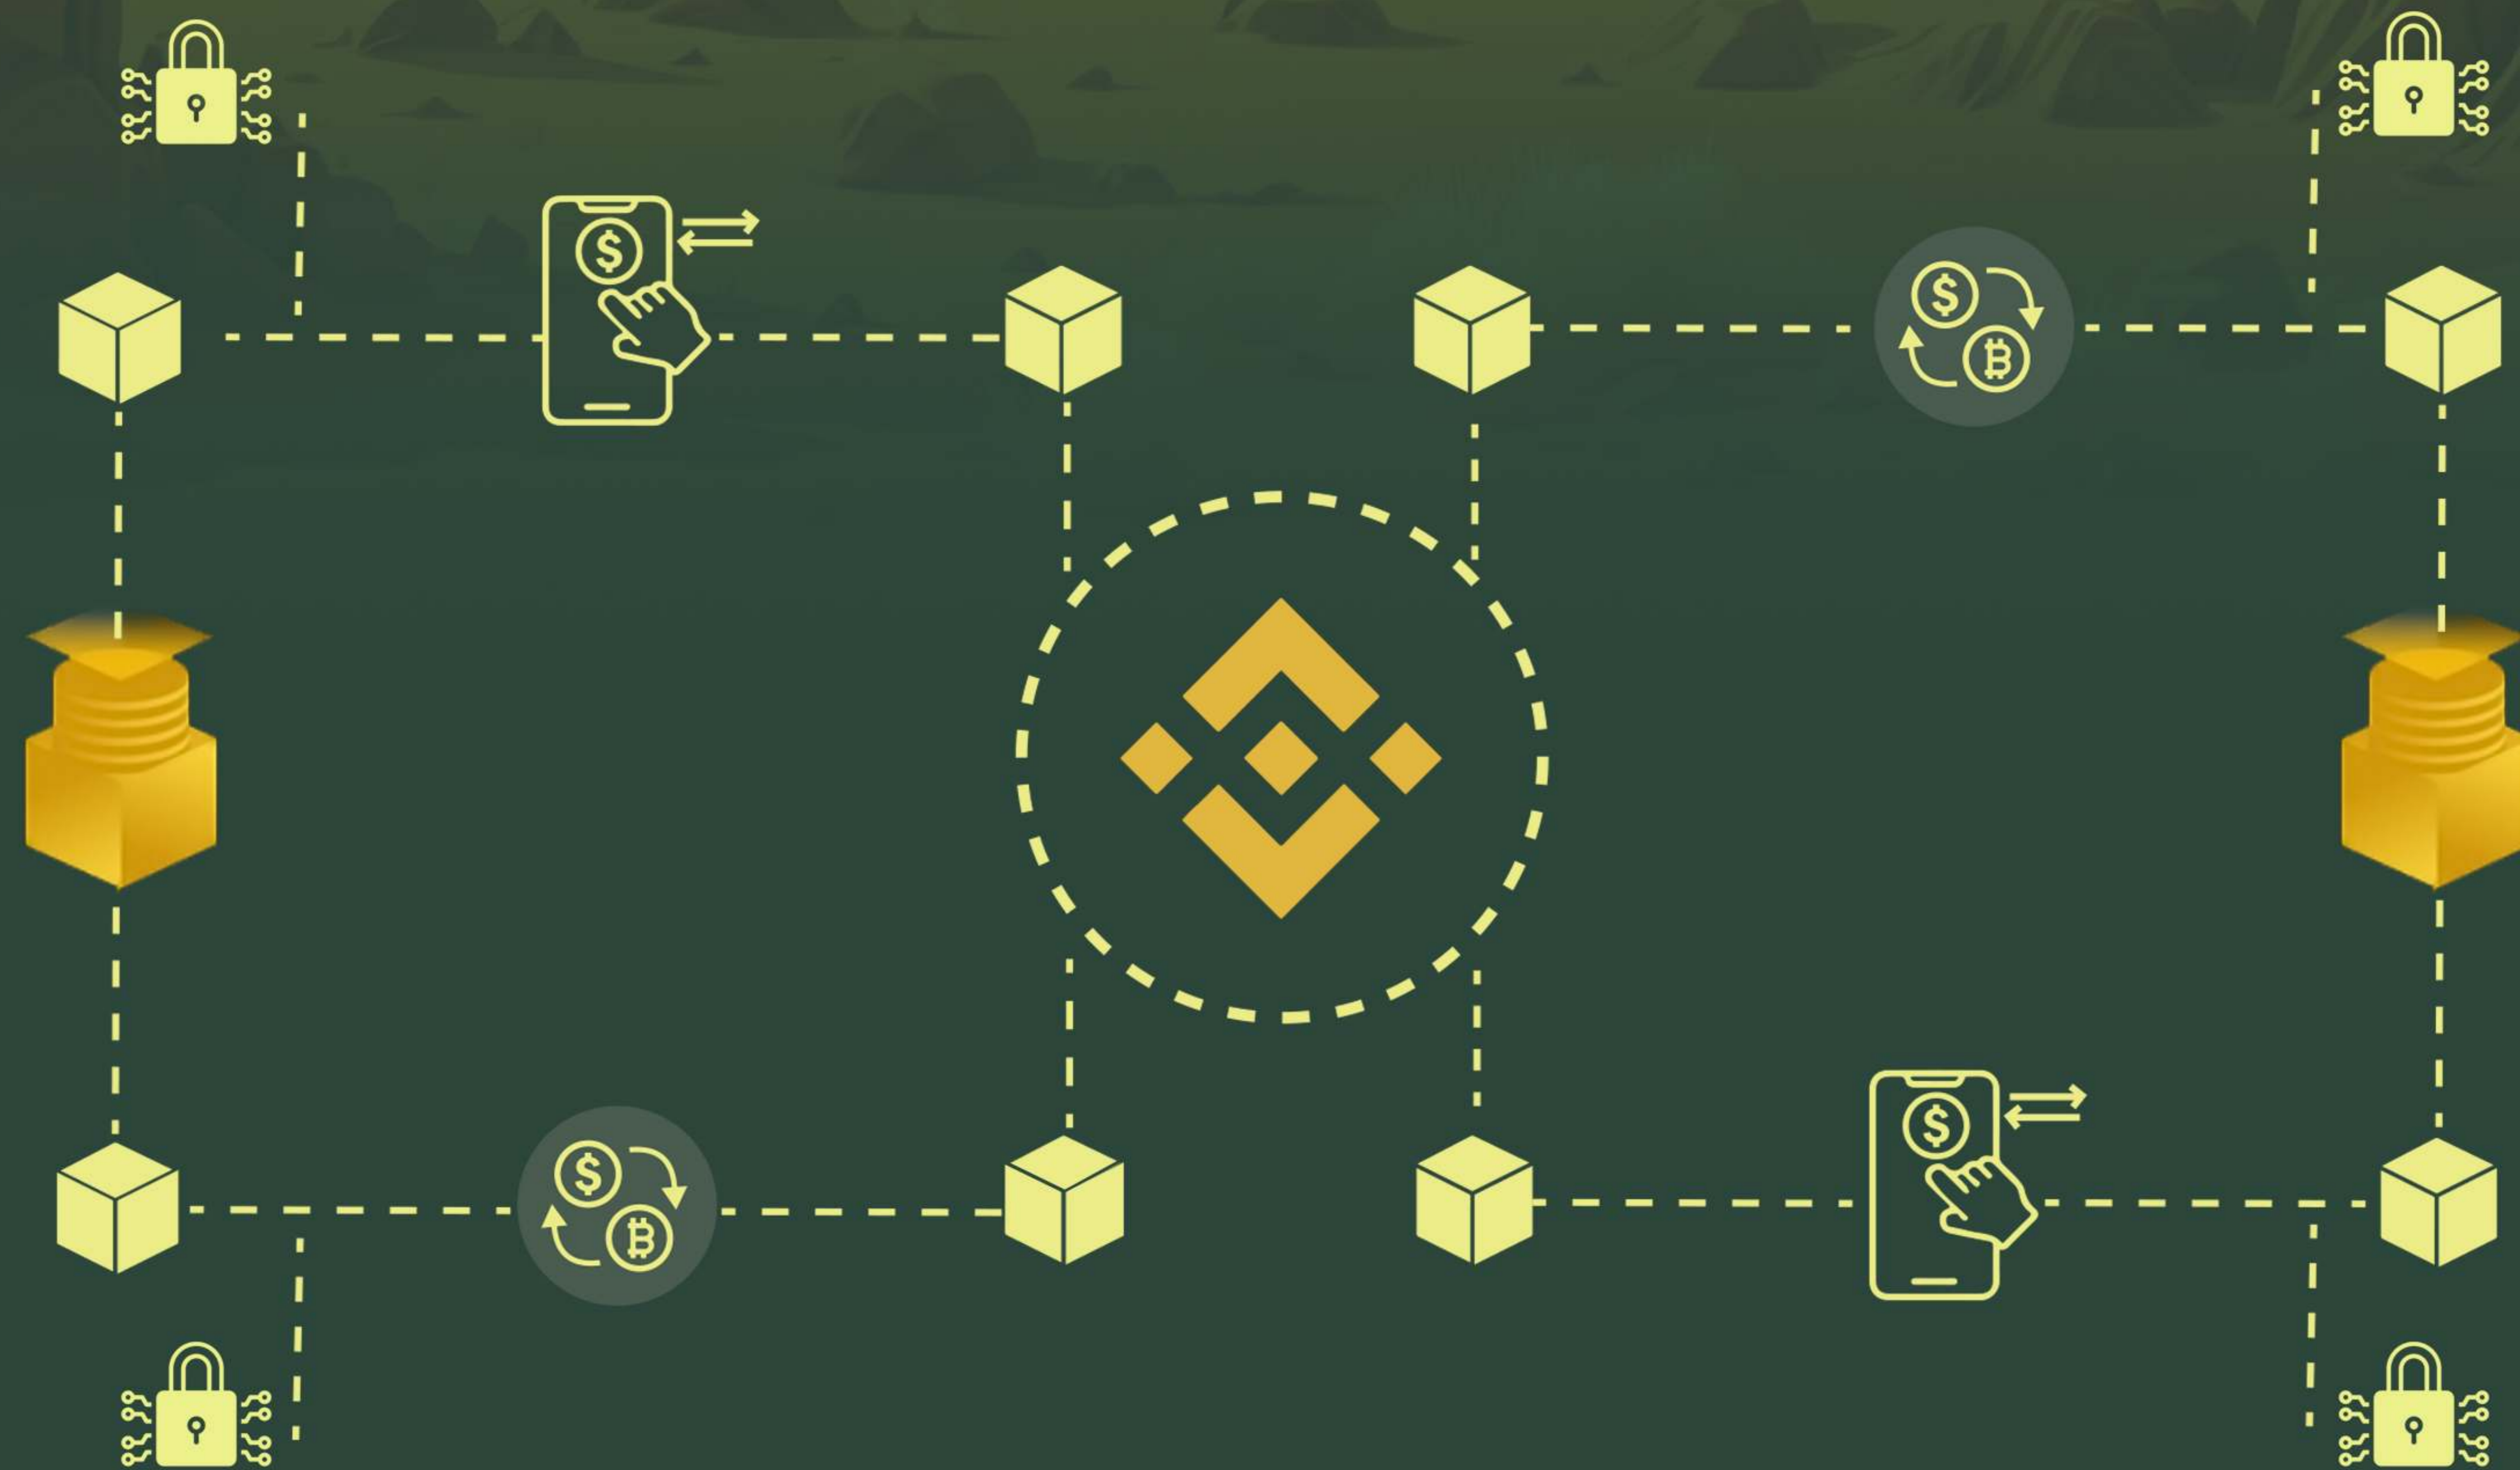

**Binance** is one of the largest cryptocurrency exchanges in the world, providing access to trade most of the well-known cryptocurrencies. Additionally, they offer tools for margin trading, futures, and options trading.

# Binance Smart Chain

**Binance Chain** - is a **blockchain platform**, developed by Binance for creating decentralized applications (DApps) and issuing tokens. It was created to provide high performance and scalability to the blockchain, as well as to improve the token exchange process.

**Binance Smart Chain** has proven itself as a community-driven, open-source, decentralized ecosystem for blockchain development.

The **BNB**  cryptocurrency was launched by **Binance** for use on their platform as a means of payment for trading fees and other services. It is also used for voting for the listing of new tokens on the exchange and receiving discounts on trading fees.

**BNB**  connected to **Binance Chain**, as it is the primary cryptocurrency on this platform. Binance also uses **BNB**  to provide liquidity on its exchange and to support various projects launched on **Binance Chain**.

**BNB**  ranks **4th** in market capitalization among all cryptocurrencies.

**128 million** users use **BNB** .

According to CoinMarketCap, the daily volume of **BNB**  is about **\$2.5 billion**.

# WHAT IS SMART-CONTRACT?

**Smart contracts** are programs on a blockchain platform that automatically execute the terms of contracts. They provide security and transparency, as they cannot be changed during operation, unlike **Web 2.0** systems.

**Web 3.0** - is a decentralized approach, where data is stored on the blockchain and does not depend on companies' or individuals' centralized servers. It is a new era of the internet that uses blockchain technology to create decentralized applications (DAPP).

Smart contracts can contain both mutable functions that can be changed during operation and immutable functions that will remain unchanged forever. Immutable functions can be seen in the **"hardcode"** of the code.

# TigerUP CAPABILITIES

TigerUP uses blockchain technology, similar to Bitcoin, but thanks to the smart contract, the project has enhanced functionality that makes it safer and more transparent for all participants.

These capabilities include:

A **fixed** probability game with winnings.

Earning **TIGERUP**  tokens with different yields of up to **1.5%** per day depending on the amount of the deposited funds.

The price of the **TIGERUP**  token is constantly growing as the number of deposits grows in accordance with the smart contract.

In case of a **BNB**  price increase, this also becomes an additional source of income.

A **double referral program** for 15 line, which allows you to receive income from investments in the system and withdrawals from it. With instant crediting to the connected wallet in **BNB** .

# WHAT MAKES **TigerUP** TO STAND OUT

**100%**

Decentralized

Even the founders and developers **cannot manipulate** smart contract **TigerUP**, because smart contracts are irreversible by design.

**Unstoppable**

The smart contract's logic is **immutable**, and it is stored in the blockchain, making it **indestructible** and **unchangeable**.

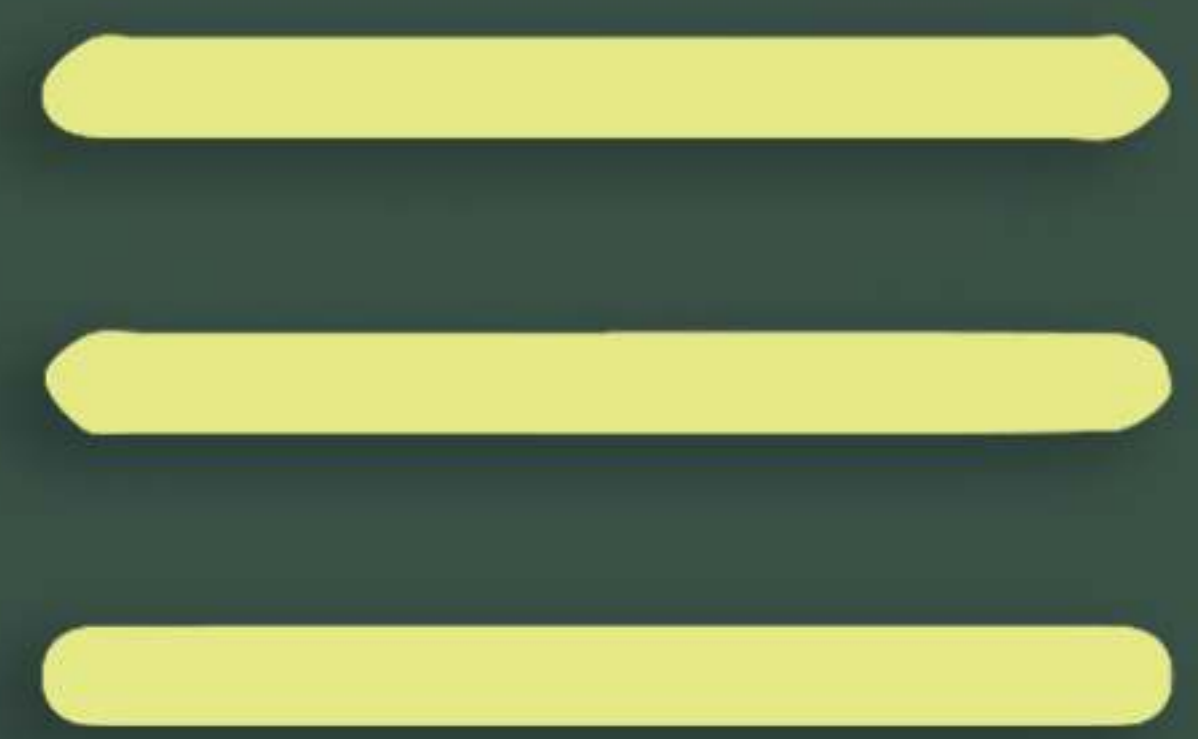

**Low Risk**

- **TigerUP** has no access to the funds.
- The **smart contract's** crypto-economics remain unaffected.
- All transactions are carried out on the blockchain and **cannot be compromised or cancelled**.
- It is not possible to block users.

User-  
friendly  
dashboard

TigerUP is

- A solid foundation for structural development.
- Cultivating a strong team of partners.

The Most **Innovative** Technology

**Web3 technology** allows users to connect with their public wallet key only, without the need to disclose any sensitive information.

**NO  
FEES**

No Special Equipment  
or Knowledge  
Required

# TigerUP SMART CONTRACT

The TigerUP website simply represents a projection of data from the blockchain, and hacker attacks on the website are pointless.

The TigerUP project's smart contract operates on the principles of the blockchain and provides complete transparency of all operations on the platform.

All users have access to the smart contract and can monitor the performance of all contract terms.

[WATCH SMART-CONTRACT](#)

**TigerUP** provides a unique opportunity to invest in **TIGERUP** tokens and put them on farming.

To receive a **1.5%** income, it is necessary to deposit a minimum of **15 BNB**. Once a profit of **200%** is achieved, token generation stops and reinvestment is required. To continue earning a **1.5%** income, you need to reinvest an amount equal to your initial deposit multiplied by **1.5**. Upon subsequent reinvestment, the profit withdrawal limit increases to **300%**, and the required reinvestment amount should be equal to the last deposit multiplied by **1.25**.

You can find more detailed information in the "**TIGERUP** Token Farming" section of our **Gitbook**.

# REFERRAL PROGRAM

The **TigerUP** Referral Program offers an opportunity to earn by inviting new users to the platform. The program consists of two parts: a **referral program for deposits** and a **referral program for claim**.

Constant Dynamic Growth  
of **TIGERUP** Token

The initial rate of  
**TIGERUP** token is **0.01 BNB** 

**TIGERUP** token has a **steadily increasing dynamic growth rate**. This is built into the **smart contract** and cannot be changed.

## Exchange limit:

The daily exchange limit is set in the range of **10-30%** of your deposit amount.  
Tokens received from referral bonuses have **no exchange limit**.

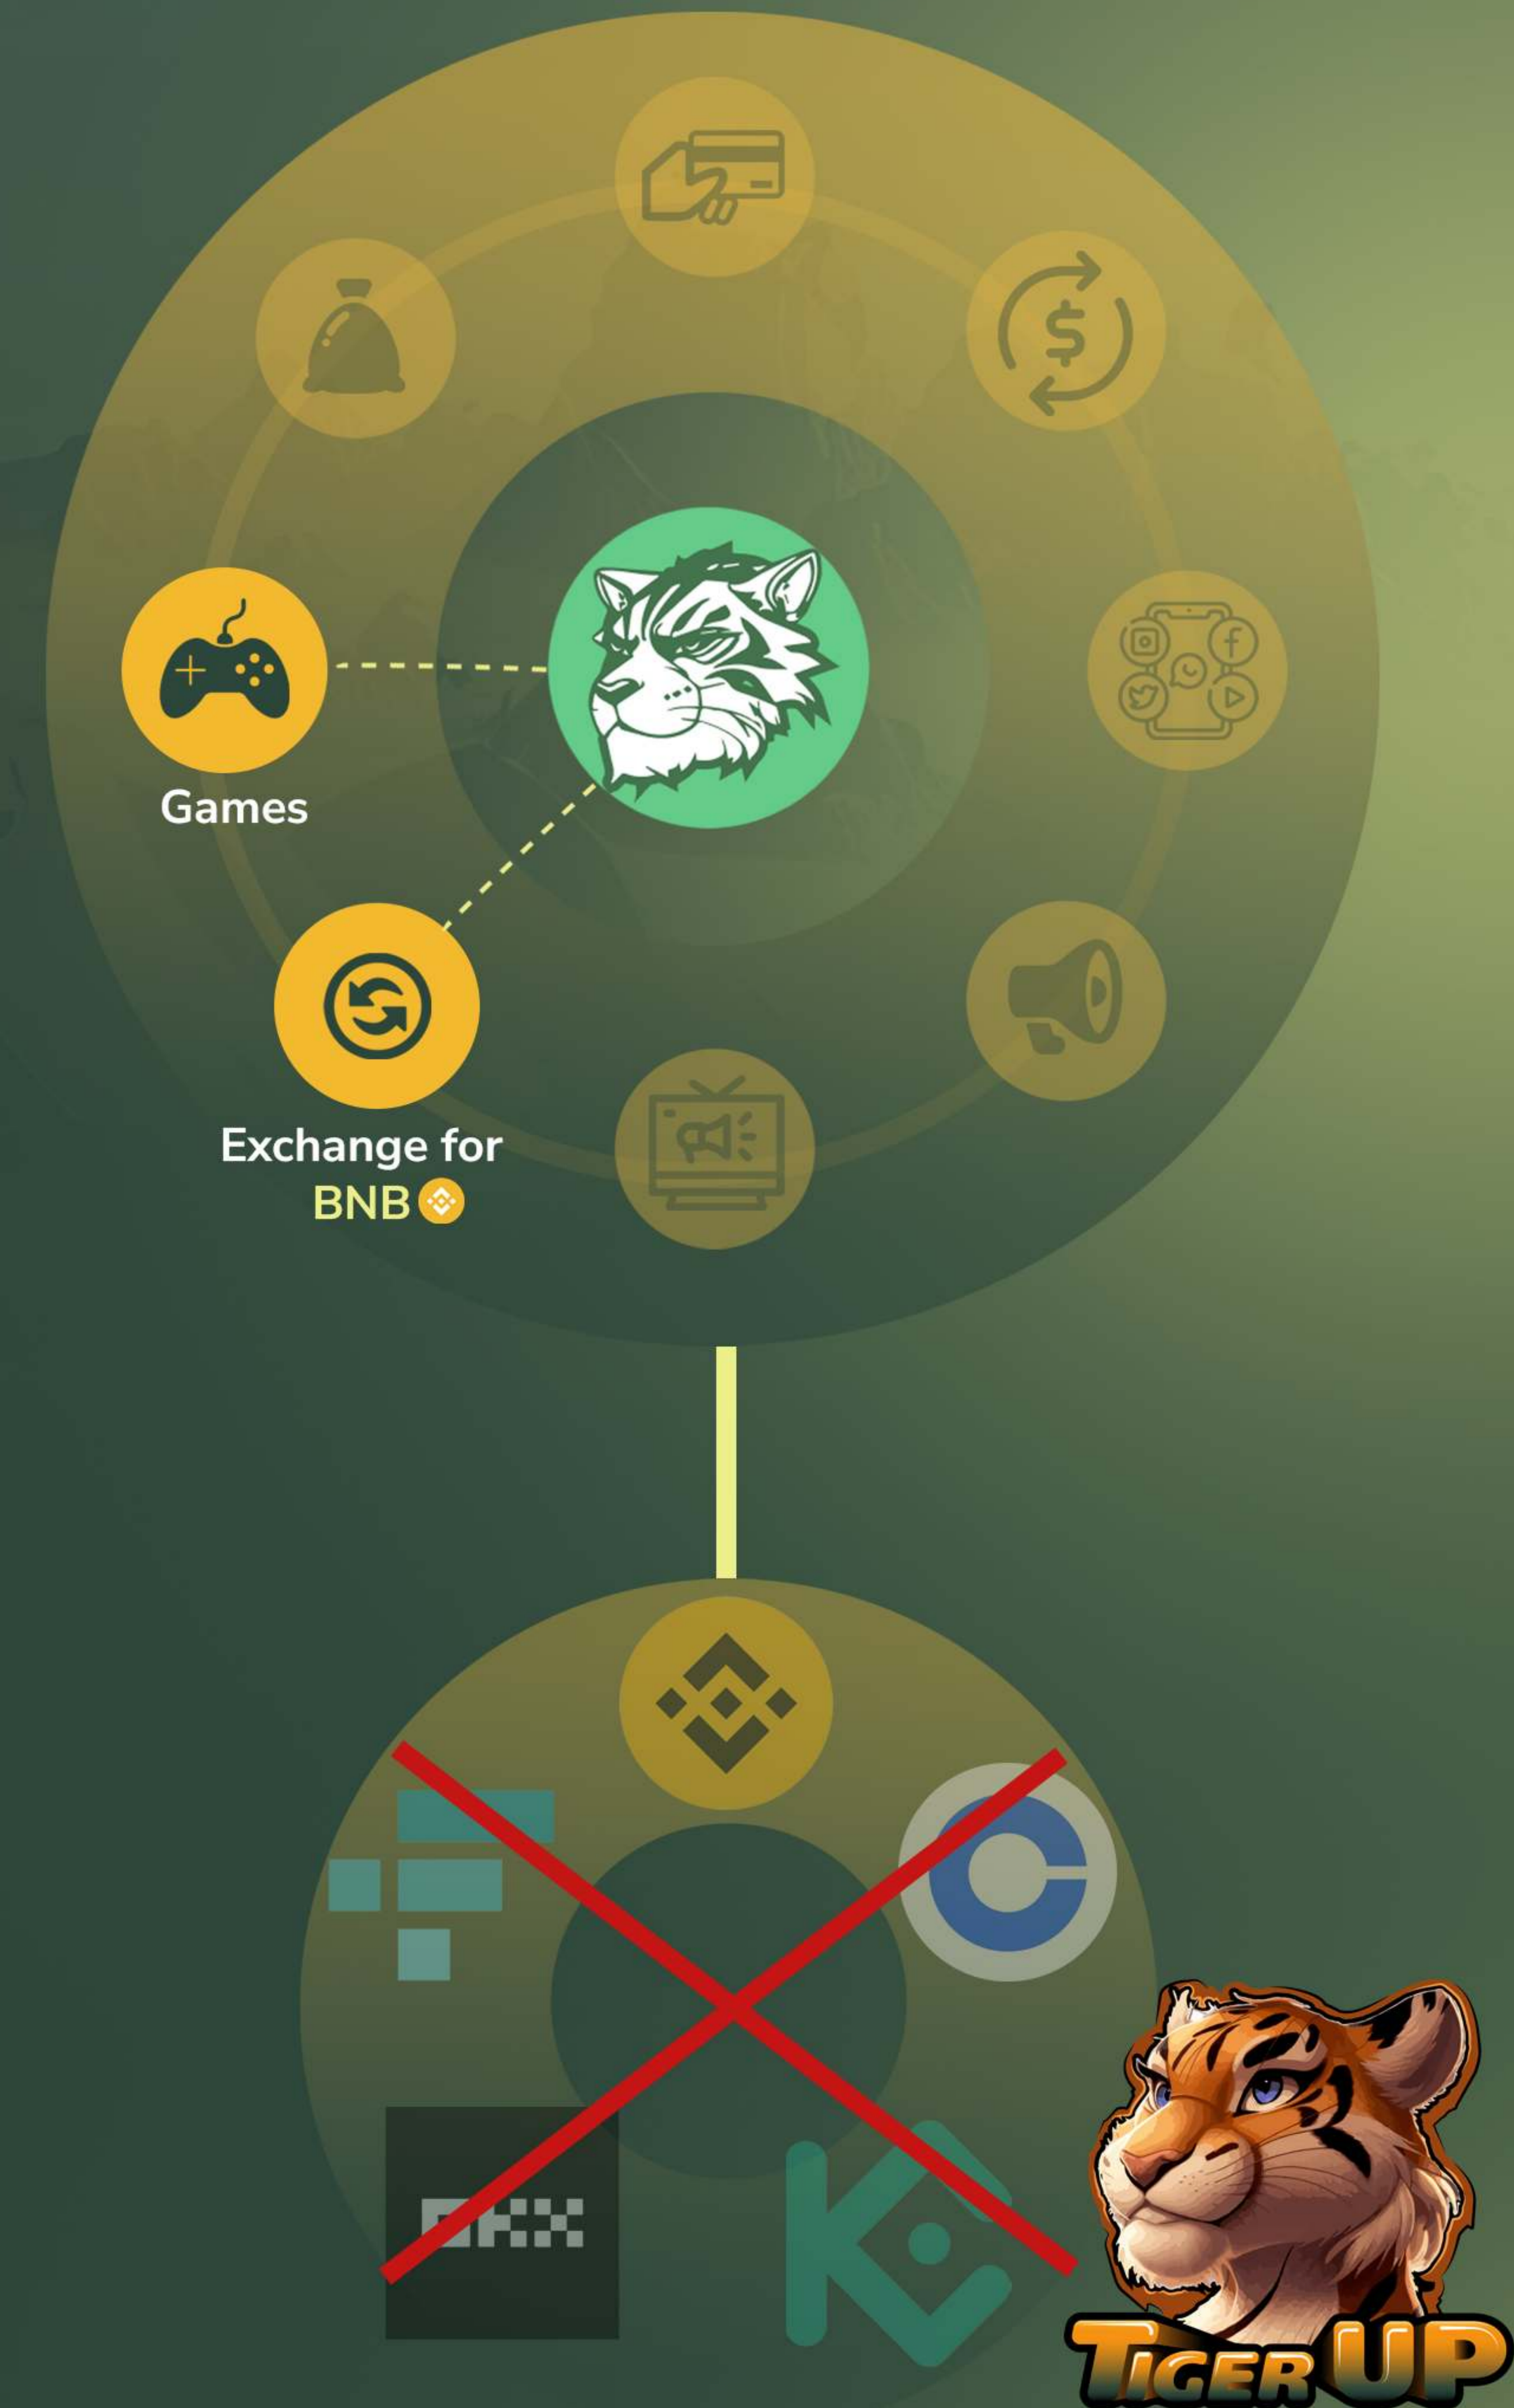

# WHY THERE WILL NOT BE LISTING OF THE TOKEN ON EXCHANGES?

The TIGERUP  token *will only be used within the TigerUP ecosystem* for participation in games and exchanged for BNB .

The token will not be listed on exchanges to **prevent** and **protect** participants from market maker **manipulation**, which can manipulate the token's price.

Tokens are generated through BNB  farming and burned through losses in games and exchanges for BNB .

There is no initial emission to protect participants from manipulation by project creators - both creators and participants operate under the same rules of the game.

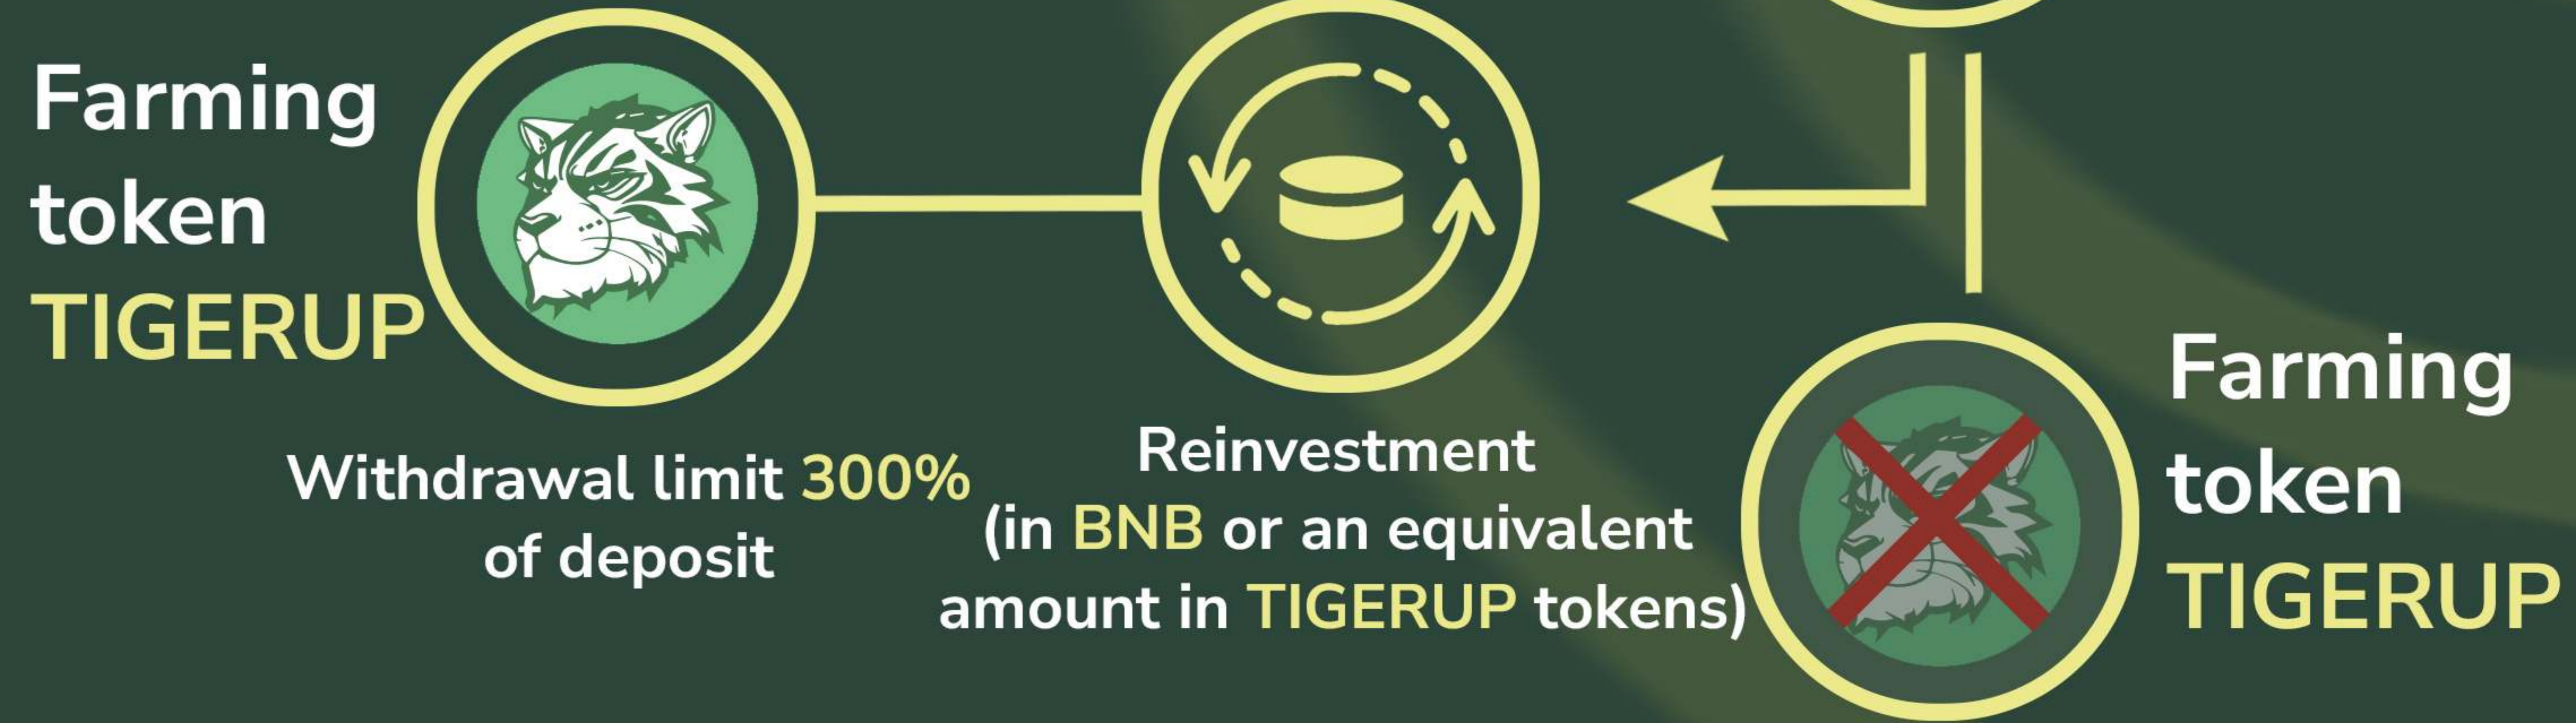

# HOW OUR PROJECT'S TOKEN

## ALLOCATION SYSTEM DOES WORK?

When you reach a **200%** profit from your deposit, token exchange will be unavailable. To resume token exchange, you will need to reinvest your funds, and the exchange limit will increase to **300%**. You can reinvest in TIGERUP tokens or BNB.

The minimum reinvestment amount is **0.01 BNB** (or equivalent in TIGERUP tokens).

More detailed information can be found in the "Token Distribution" section of our Gitbook.

# GAME MODE

Increase your balance of **TIGERUP** tokens!  
Choose the amount of **TIGERUP** tokens you want to use for the game and try your luck in the gaming mode.

Game	Winning chance	Multiplier
1	40%	x2
2	35%	x2.5
3	30%	x3
4	25%	x3.5
5	20%	x4

We offer an **unlimited** number of games with different winning chances and multipliers.

Results are saved **for one day** or before you lose.

The earned tokens will be taken into account as a deposit, meaning that you can exchange them within the limits established by the smart contract. The limit for the initial deposit is **200%**, and **300%** for subsequent reinvestments.

# All countries in the world are able to participate in the project.

Investors from all over the world invest BNB  and farm TIGERUP  tokens. The liquidity pool is constantly increasing, which allows for the exchange of tokens for BNB  after farming.

A portion of the funds from gambling participants after the game are returned to the liquidity pool from losses.

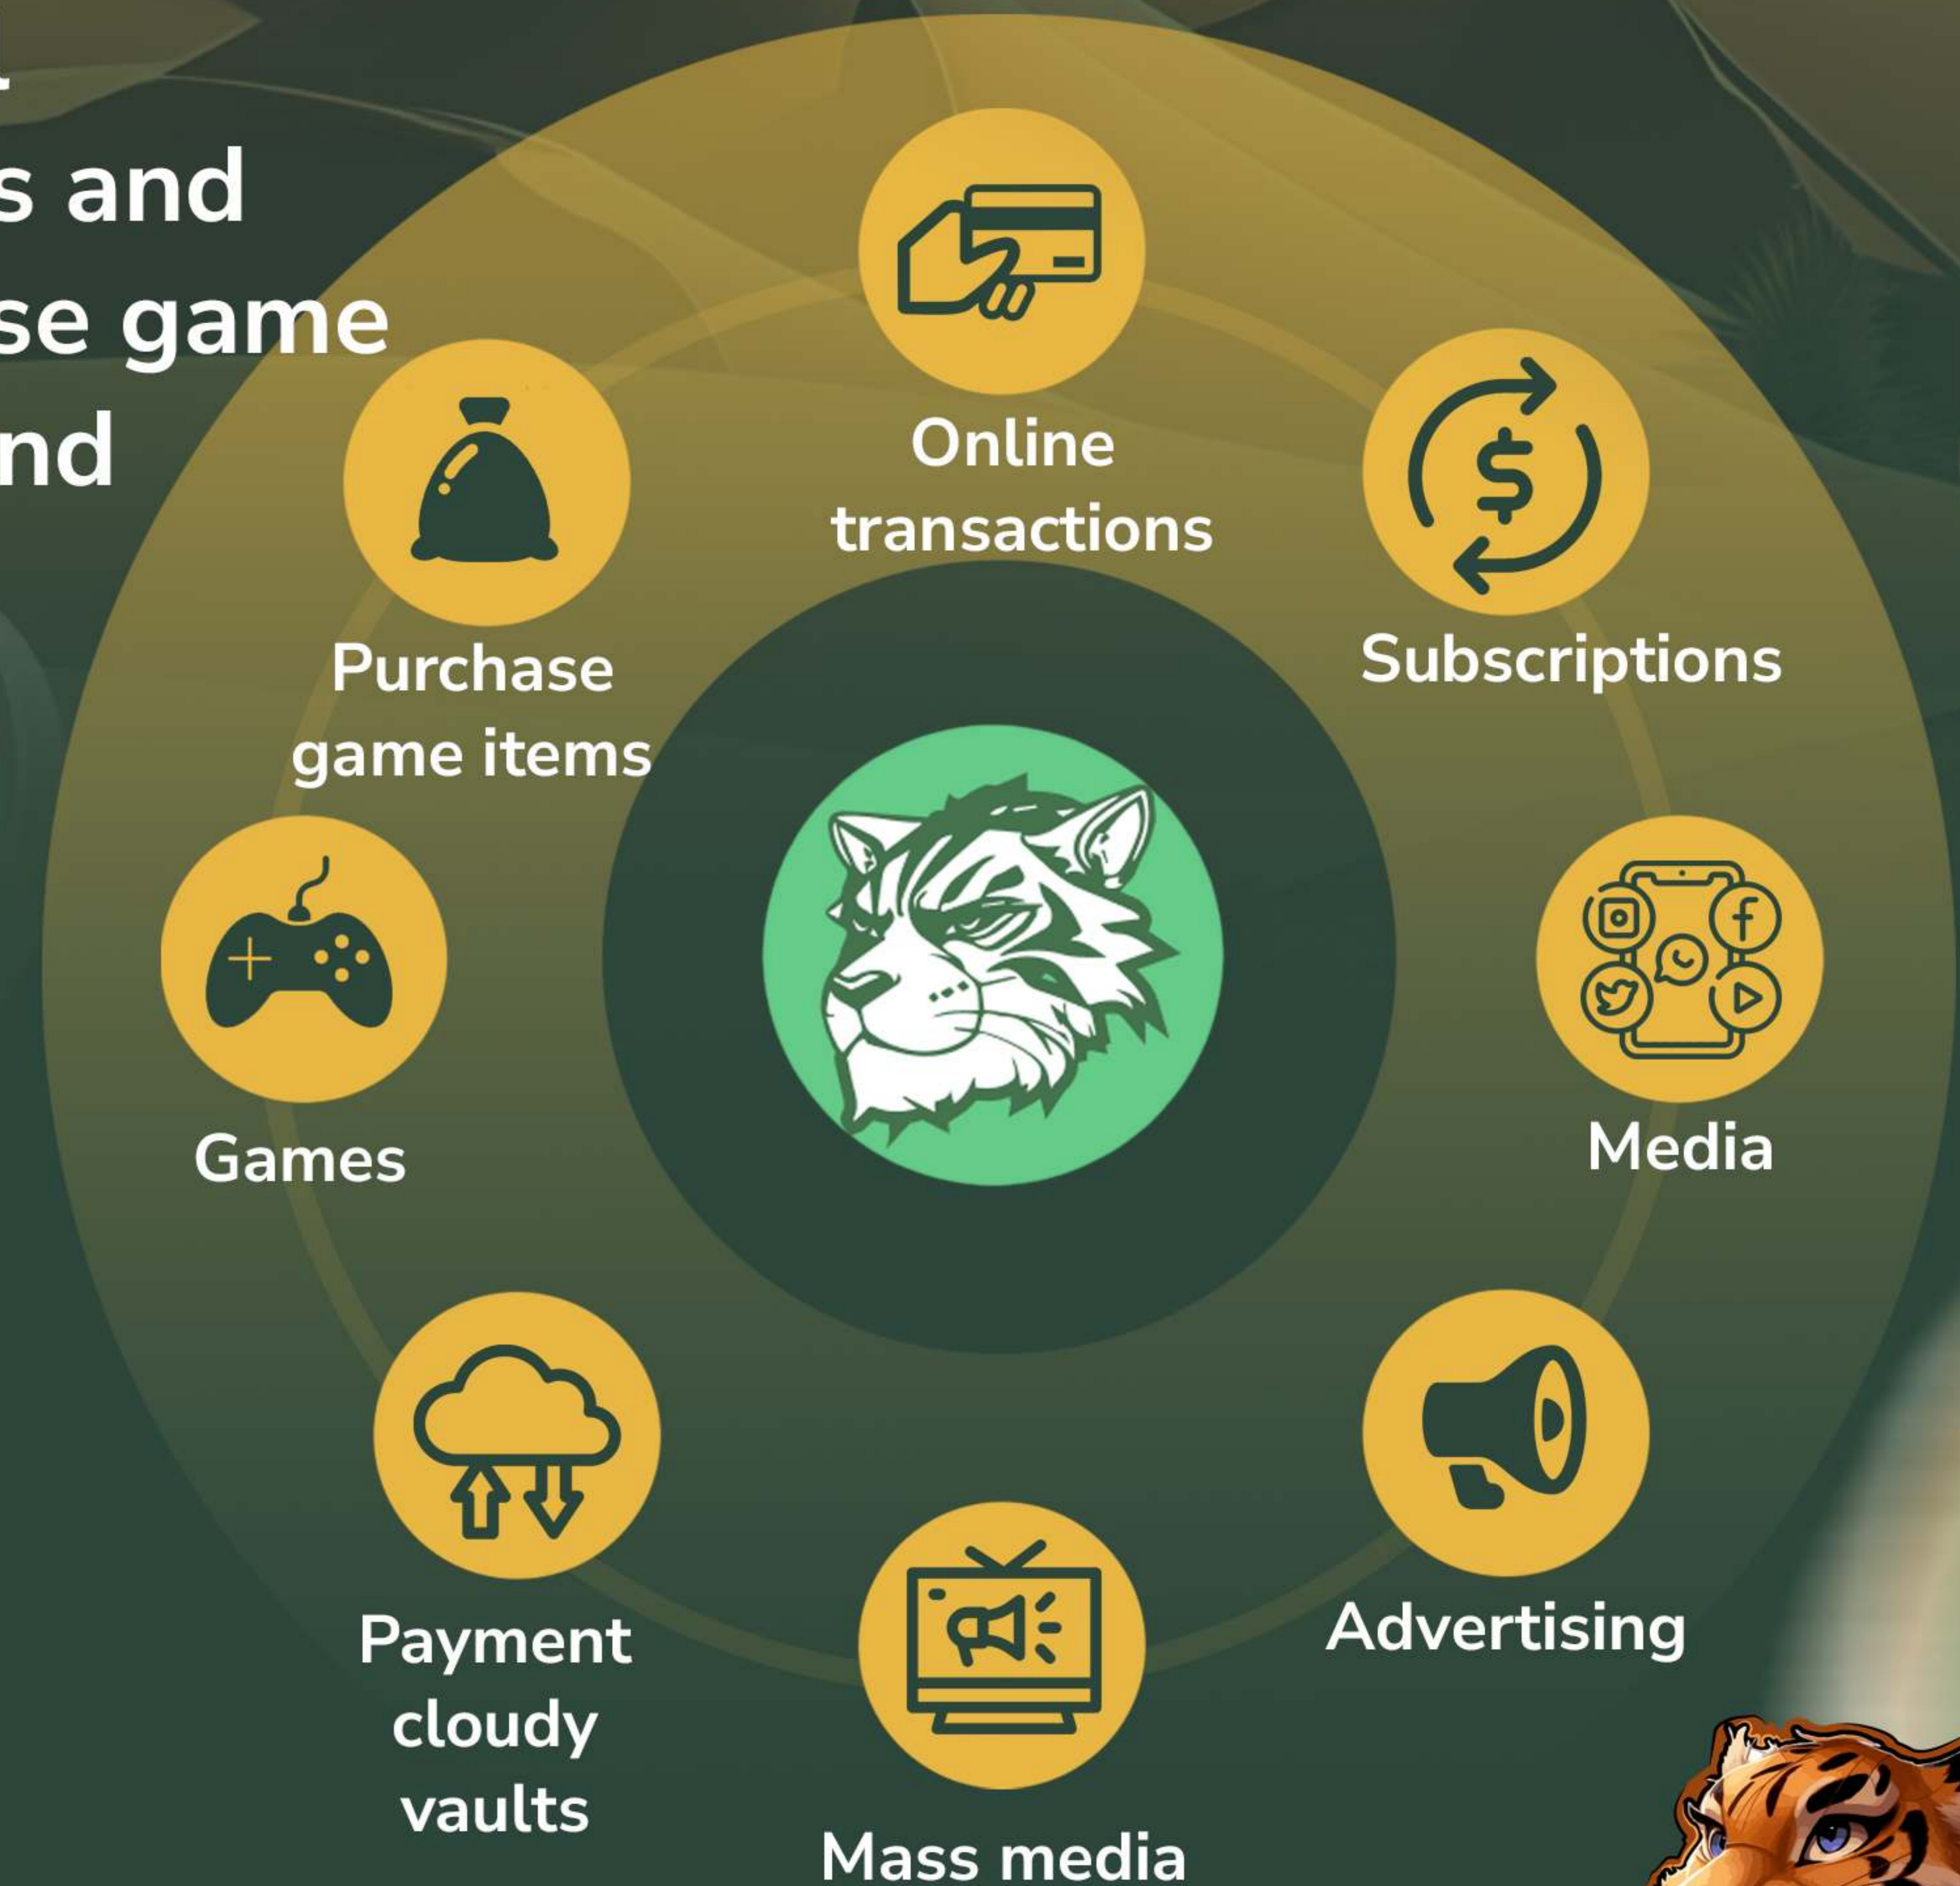

# GENERAL PLAN

In the future, the **TIGERUP**  token may become a universal cryptocurrency for payments within the ecosystem of games and other useful services. For example, it can be used to purchase game items, subscriptions to games, pay for cloud data storage, and other services

Moreover, thanks to its **security** and **transparency**, **TigerUP** can become a popular means of conducting online transactions in various industries such as finance, media, advertising, and so on.

Overall, **TigerUP** has the potential to become one of the **key cryptocurrency projects** in the future due to its innovative technology and earning opportunities.

# 2023

## Q1

- Publication of the beta version of the smart contract on the developer forum
- Backend microservice for smart contract integration

## Q4

- Smart contract and game launch in China, Korea, Indonesia, Europe, and Latin American countries
- Testing of new blockchain games with move-2-earn and play-2-earn mechanics
- Offline community events

Current status

## Q2

- Testing of smart contract functionality and troubleshooting
- Scalable cloud infrastructure ready for use
- Game development
- Website and documentation overhaul

## Q3

- Closed alpha version testing
- Smart contract and game launch in India
- Starting price for TIGERUP token - 0.01 BNB
- Website fine-tuning and improvement
- Development requirements for new games

**2024**

**Q1**

- Website and mobile app interface improvements
- Global app marketing campaign for Web 2 audience

**Q2**

- Expansion of the development and marketing team
- Social media and blog marketing campaigns
- Release of the app on the main network

**Q3**

- Launch of Android version of the app on Google Play
- Launch of iOS version of the app on the App Store
- Partnership with major gaming companies for TIGERUP token integration into their games

**2025**

**Q1**

- Writing beta version of multi-chain wallet
- Wallet testing and integration with messenger for partners
- Wallet integration with messenger for partners

**Q4**

- First blockchain game tournament with prize pool in TIGERUP tokens
- Development and launch of multiplayer blockchain game with the ability to win TIGERUP tokens

**Q2**

- Integration of wallet with web3 browser and dex marketplace for dex applications
- Launch of wallet for community
- Bug fixes
- Expansion of advertising network

**Q3**

- 10,000,000 TigerUP users
- Move-2-earn and play-2-earn games launched worldwide
- Launch of wallet worldwide

**Q4**

- Launch of browser with dex marketplace for dex applications
- 100,000 users of the wallet

**2026**

- TIGERUP token price +1 BNB
- 1,000,000 users of the wallet, game ecosystem, messenger, and browser with marketplace
- Continued development

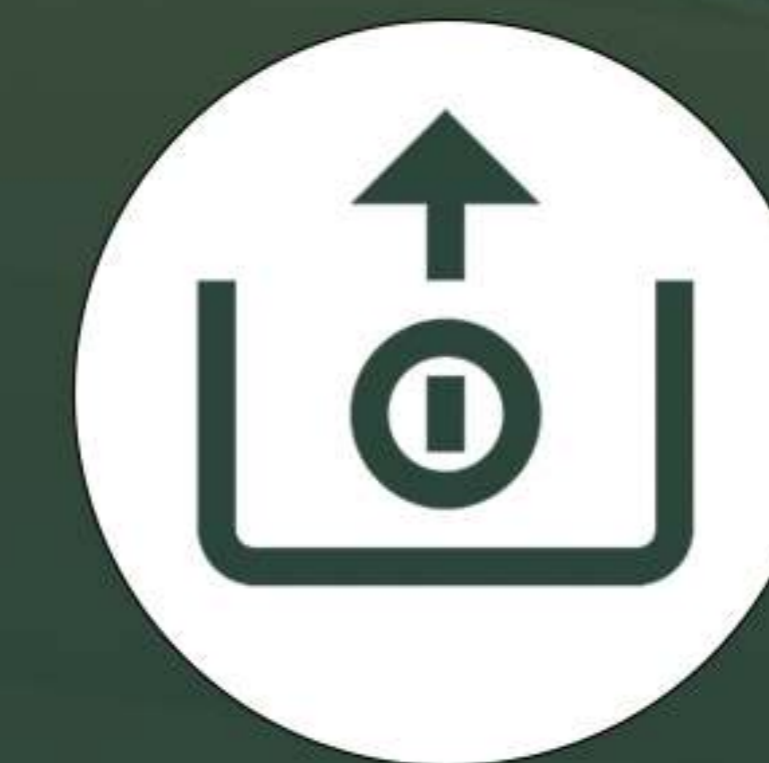

This map is more of a wish from the creators than a strict action plan, promise, or guarantee. However, if each service user follows **two simple rules of the game**, implementation is possible

It is important not to withdraw more than **50%** of your deposit and to keep at least **50%** on your balance, as well as to ensure a **15%** weekly increase in the liquidity pool.

Thus, the success and longevity of the project depend not on the creators, but on the community of users. However, following these rules, users can also **protect their interests and get the maximum benefit** from participating in the project.

**This is not a roadmap, promise or guarantee. It is a developer's wish list.**
