

4.5 Best Practices Module:

Compliance & Proof of Testing

SeaLights Quality Use Cases

Compliance

Proof of Testing

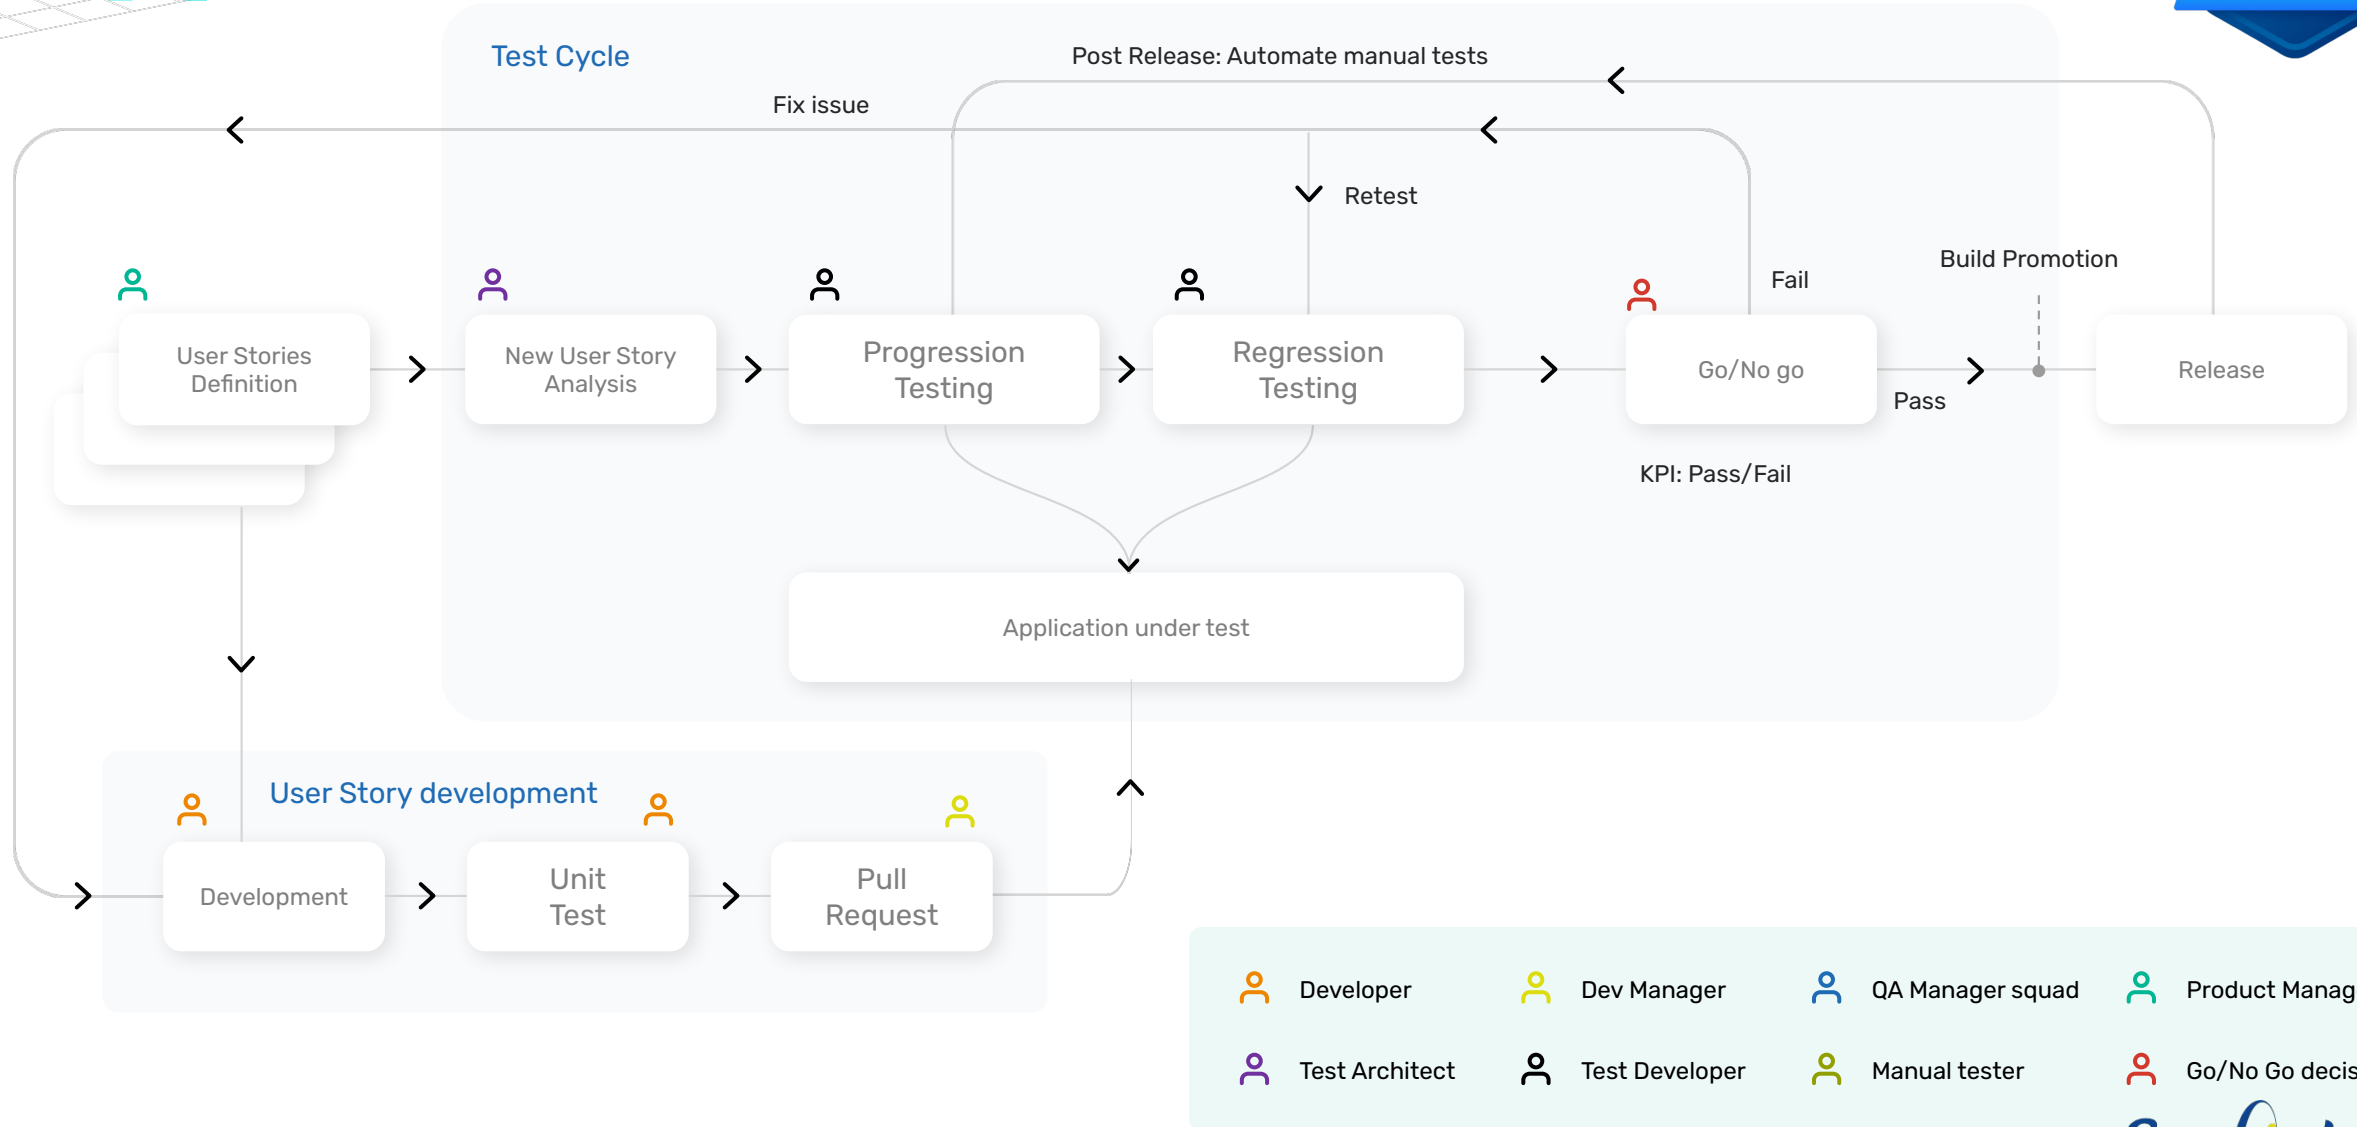

Providing detailed Test-to-Code Coverage proof, on demand, for the quality level of a product, overlooking the entire code base, through an aggregation of all the different test stages and environments

Compliance/Proof-of-Testing

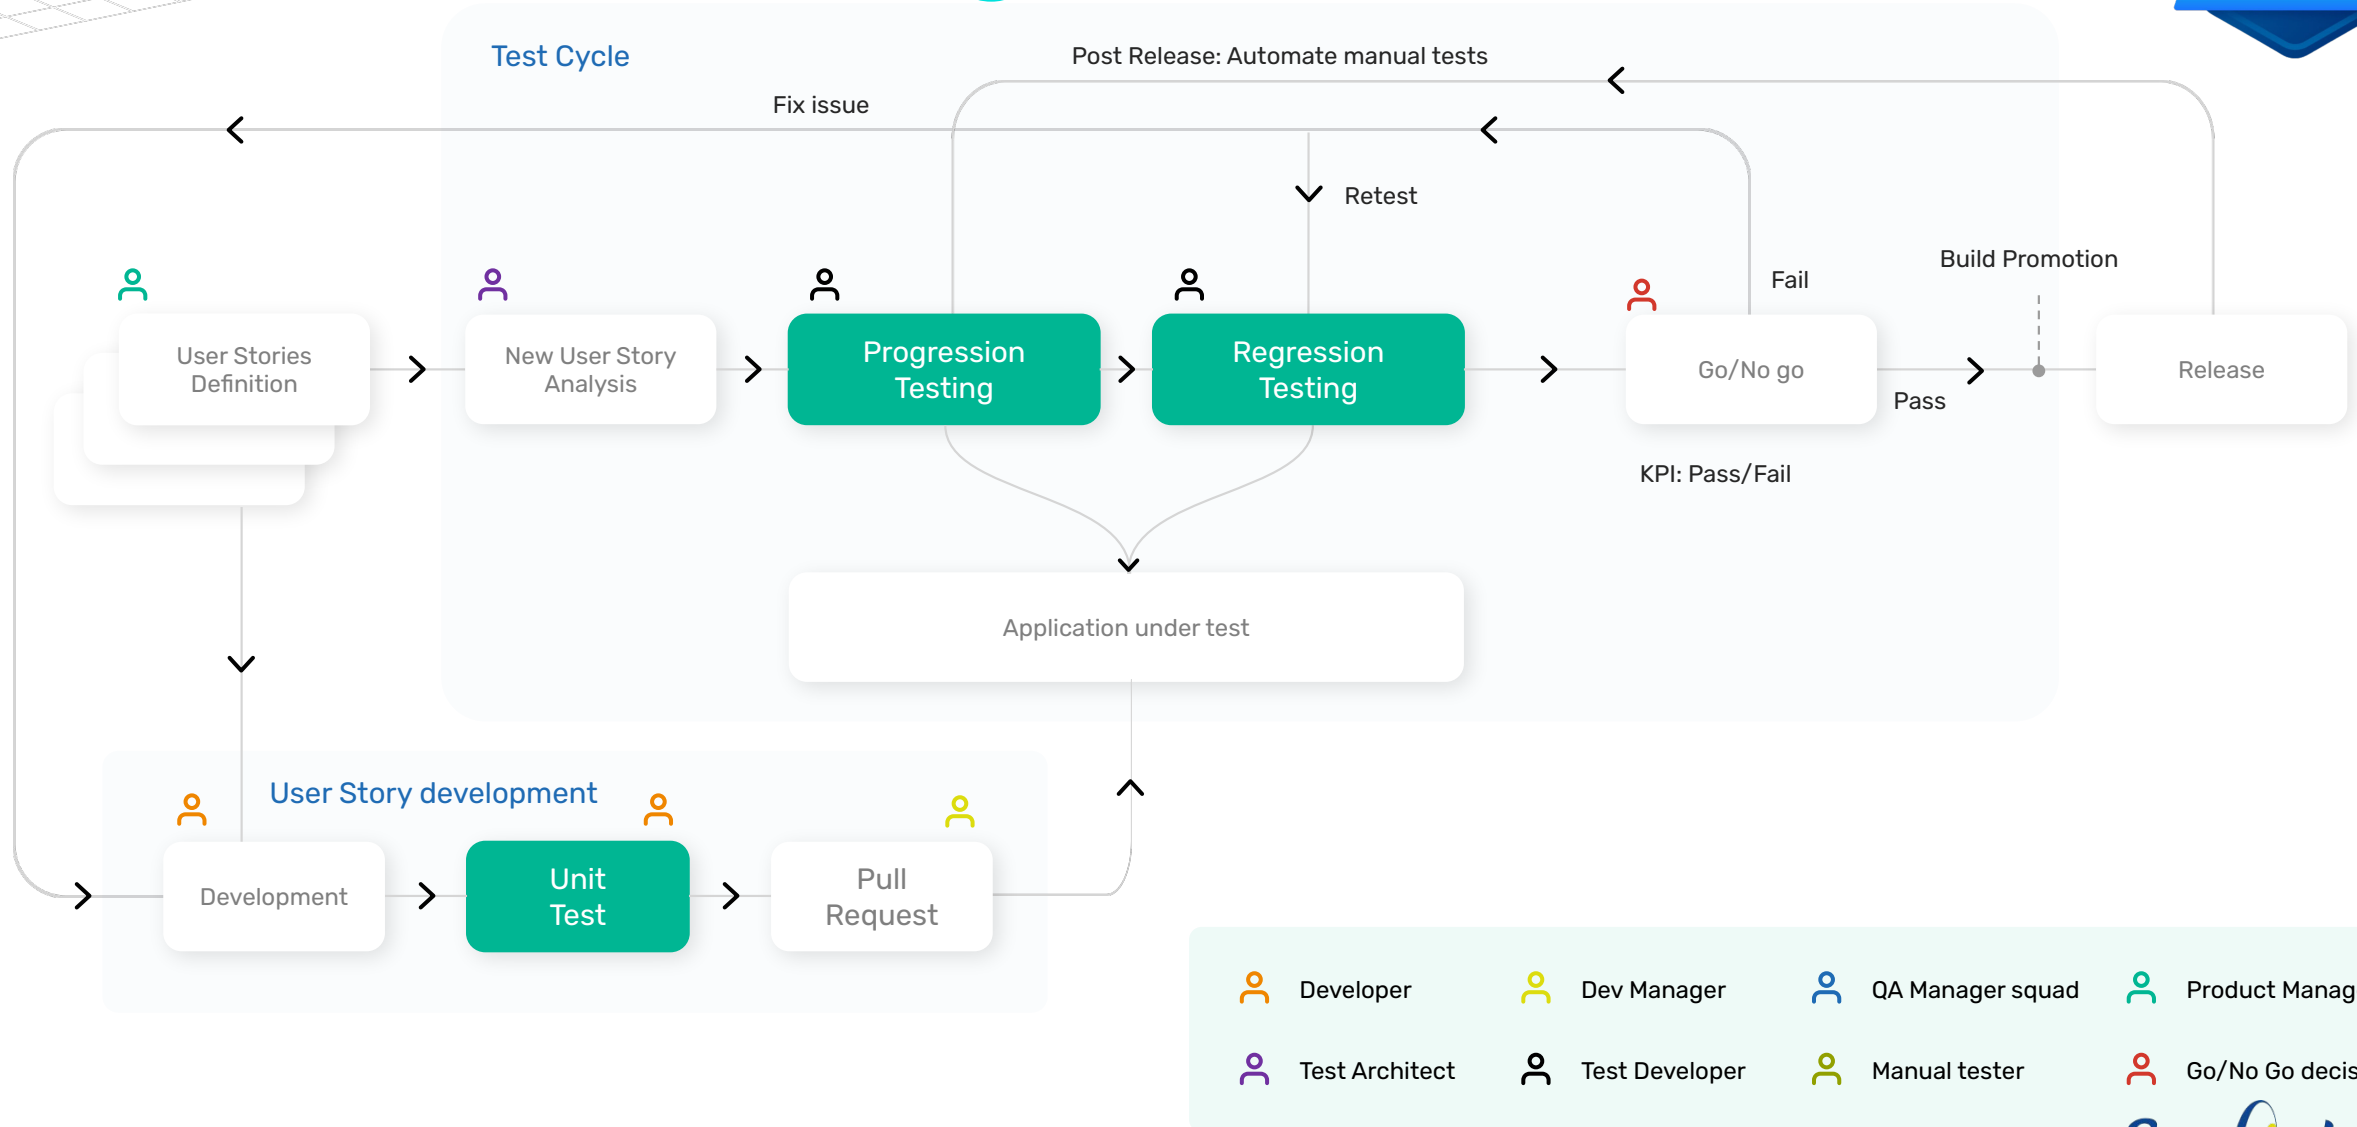

Release Manager

Typical SDLC

Proof of Testing

Branching Strategy

Single Branch

Single App in Sealights

- Create a TGA report covering the relevant app and branch for the full cycle date/builds range
- Review the test gaps
- Query the relevant team members on the test gaps
- Perform coverage based risk management

Multiple Branches

Multiple Apps/Integration-Builds on Sealights

- Create an Executive report covering the relevant app and branches for the full cycle date range
- Download the detailed report and filter it to show only methods that aren't tested by any of the test stages
- Review the test gaps and query the relevant team members on the them
- Perform coverage based risk management

Test Gaps Focused Proof of Testing (Single Branch)
