

ID Scan Document Coverage

Version Control

Version control is a method of managing multiple variations of the same document, particularly when it is important to keep a clear record of how the document was created, developed, and changed over time.

Each time the document is revised a unique identifier should be applied, which will enable Tiller to identify the latest version of the document and differentiate between drafts and final approved versions of the document.

Author: Jonathan Ripper – *Head of Product* **Reviewed:** Mark Cadby – *Chief Technology Officer*

Version	Author	Purpose/Change	Date
V 0.1	JR	First draft	24/07/2023
V 1.0	MC	Reviewed	25/07/2023

Review

This document has been reviewed and approved by **Mark Cadby**, Chief Technology Officer, has reviewed the document and ensures that the document is in keeping with current technical understanding.

Effective Date:	25/07/2023
Version:	Final

Purpose of document:

This document provides a list of country-specific identification documents processed by the Verify by Tiller identity verification service. This table confirms the types of identification documents from available countries that Verify by Tiller can support as part of the identity verification process.

This table is accurate to **July 2023**. This list is subject to change.

Countries available - 176
