

Worksheet	Column Name	Download Details	Upload Details	Input Data Expected	Remarks
Dataset_Correcti	SchemaName*	It contains the Schema Name to which the dataset is mapped.	It is a mandatory field. If it is left empty, the template will not update any metadata of a dataset that the user inserts into the template.	A valid Schema Name should be entered that exactly matches the Schema to which the dataset belongs.	Each Schema Name is unique for a Connector.
Dataset_Correcti	DatasetId*				
Dataset_Correcti	DataSetName*	It contains the Dataset name for which metadata is updated.	It is a mandatory field. If it is left empty, the template will not update any metadata.	A valid Dataset Name should be entered for which the users want to update metadata.	
Dataset_Correcti	LineageStatus	It contains the lineage status of the dataset.	It is not a mandatory field. If it is left empty, The template will still update the metadata and will keep lineage status as blank.	A valid lineage status should be entered and it should be one from the OvalEdge pre defined statuses. For ex: Success Lineage Build.	
Dataset_Correcti	ActualQuery*	It contains the actual query which is present in the application within the dataset.	It is a mandatory field. If it is left empty, The template will not update the metadata.	Exactly same query should be entered which is present in the crawled dataset.	It should be crawled in the application.
Dataset_Correcti	CorrectedQuery*	It will be blank when downloaded.	It is a mandatory field. If it is left empty, The template will not update the metadata.	A valid query which the customer wants to update should be entered.	
Dataset_Correcti	Manuallineage	It contains the information of whether it is used in Manual lineage or not	It is not a mandatory field. If it is left empty, The template will still update the metadata and will keep manual lineage status as blank.	Input value either Yes or No.	

Dataset_Correcti	Action*	<p>If users are downloading the template to upload metadata, the field will appear empty. However, if they are downloading the same template provided by the application immediately after uploading, it will display the input that was entered during the upload process.</p>	<p>It is a mandatory field. If it is left empty, the template will not update any metadata of a dataset that the user inserts into the template.</p>	<p>Users must enter one of the following valid actions to update or add metadata for the dataset: Add, Modify, Delete, No Action.</p>	<p>For the Action options -  Add: Add is used to add new Datasets to a Manual Connector.  Modify: The Modify option is used to modify and update the metadata of all datasets. It also factors in the Load Metadata Configurations while uploading.  Delete: This option can be used by the users to delete a dataset.  No Action: If users set this as the option and upload, any input metadata change will be ignored.</p>
Dataset_Correcti	Action Status	<p>If users are downloading the template to upload metadata, the field will appear empty. However, if they are downloading the same template provided by the application immediately after uploading, it will display as Success or Failure, depending on the execution status of the action.</p>	<p>It can be empty. Even if it is not empty, it is ignored during upload.</p>	<p>Not Required</p>	

Dataset_Correcti	Action Success Mes	<p>If users are downloading the template to upload metadata, the field will appear empty. However, if they are downloading the same template provided by the application immediately after uploading, it will display the Success messages of all actions that have been executed successfully.</p>	<p>It can be empty. Even if it is not empty, it is ignored during upload.</p>	<p>Not Required</p>	
Dataset_Correcti	Action Failure Mess	<p>If users are downloading the template to upload metadata, the field will appear empty. However, if they are downloading the same template provided by the application immediately after uploading, it will display the Failure messages of all actions that were not executed successfully.</p>	<p>It can be empty. Even if it is not empty, it is ignored during upload.</p>	<p>Not Required</p>
